

Web3 Carbon Solutions

Our Purpose :

**We aim to accelerate  
CO<sub>2</sub>e removals and a  
sustainable finance in a  
verifiable way**

**Our world is at a tipping point where global warming and the cascading deterioration of ecosystems have already begun**

**Excess CO<sub>2</sub>e and damage to biodiversity are a reality that threatens our existence**

**Conservation is no longer enough to reduce CO<sub>2</sub>e**

**Removing carbon from the atmosphere to regenerate the planet must be our main goal to restore balance and deliver a future for our children**

**To accelerate this CO<sub>2</sub>e removal, a scalable financial tool already exists:**

**Carbon Credits**

**Remove 1.000 millions  
tons of CO<sub>2</sub>e a year by  
2033, which is  
equivalent to the carbon  
emission of the entire  
South America  
Continent**

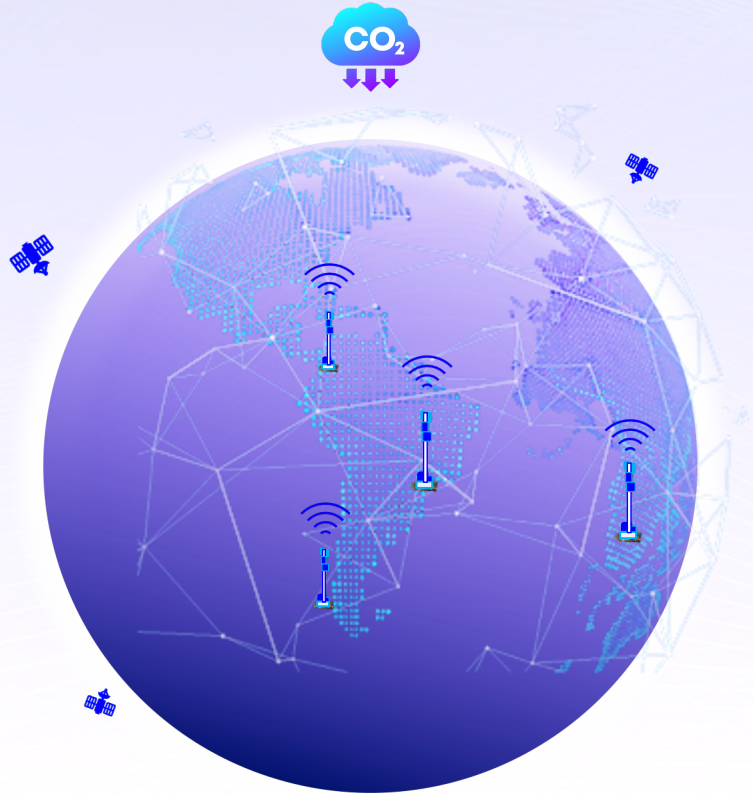

**Develop High Quality  
data-driven Carbon  
Dioxide Removal (CDR)  
for effective and verifiable  
climate action**

Use in-situ data tools and  
blockchain as undeniable  
proof of CO<sub>2</sub>e capture  
of carbon removal projects
